Manual

m-WM100 - Water detector

Scope of supply

- Water detector
- 9V block battery
- Instruction manual

Specifications

- Battery: 9V battery module
- Operating temperature: 4 - 38°C
- Air humidity: 25% - 85% (in room)
- Warning signal: ≥ 85dB within 3 meters

General Information

This water detector is ideally suited to identify a water leak early and prevent possible costly repairs, caused by defective devices with a cold or hot water connection.

Recommended location for alarm system installation

attics, kitchens, bathrooms, toilets, basements, boiler rooms, garages etc.

Activation instructions

1. Open the cover carefully by turning the bottom anti-clockwise.
2. Connect the supplied 9V battery and close the backcover.

Operating test

Place the device on a damp cloth. Once the three moisture sensors at the bottom detect the moisture of the damp cloth, the alarm sounds. By lifting the device, the alarm stops automatically.

Protecting the environment

At the end of its service life, this product must not be disposed of with the normal domestic waste. It must be taken to an assembly point for the recycling of electrical and electronic devices. This is indicated by the symbol on the product, the instruction manual and packaging. The materials and substances can be recycled according to their marking.

The reutilisation of recycled substances or other forms or recycling of old devices significantly helps the environment. Please contact your local authority for information regarding the relevant disposal points.
